

Brothers and sisters

2020 Will be a year we won't forget too soon but wish we could

Here we are now in May and covid-19 has been affecting the worlds population

In one form or another.

My wish is for all our families to be healthy and safe as professionals work to eradicate this virus.

We have just passed May first which is recognized in many countries around the world as May Day or International workers day here in north America.

Mothers Day is coming this week end, so let's not forget to recognize our Mothers, Wives, Sisters And Friends who are mothers.

I have been in touch with Roland Kiehne our National Education Department Director and as of now September is the target date to resume education courses at Port Elgin.

This too is subject to change with the on going policies the government agencies have implemented.

As of now there is no course information posted online but will update as that becomes available.

With our upcoming negotiations taking place in September, this falls courses may have to be put off till

The winter session.

Those who had their courses canceled this year will be looked at first

I hope we will soon be able to get our lives back to normal as possible and have answered any questions

Members might have regarding our education program.

In Solidarity

Brad Mayberry
